**Why Retirement Planning is Important for Everyone**

We are so much engrossed in our day to day activities of life that we almost forget to plan our retirement. But retirement planning is very important in order to have a financially independent life after retirement.

**Why is Retirement Planning Necessary?**

You need to closely look at each of your income sources, if you wish to plan for your retirement. Let us suppose that you start your savings when you are 30 years old. The advantage of starting early with your retirement planning is that you can have a time period of 30 years to accumulate a
